

Industrial Aerial Lift Truck Operator ON-SITE SAFETY TRAINING SEMINARS

By law*, all lift truck operators must be trained and retrained every 3 years.

Protect the safety of your staff, reduce product, equipment and facility damage and ensure OSHA compliance by providing required safety training on a regular basis.

Safety Training Seminars by Forklift Safety Consultants provides your company with:

- Professionally trained operators
- Documented OSHA compliance
- Lower accident potential as much as 70%
- Reduced likelihood of product damage
- Improved operational efficiency
- Potential insurance savings

* United States Department of Labor, OSHA Regulations, Part 1910, Standard Number 1910.178: Powered Industrial Trucks

Safety Training Seminars are conducted at your location at your convenience.

All 2 1/2 hour in-person on-site seminars include:

- Interactive training materials
- Comprehensive written examination
- Operator's Permit and official Certificate of Completion
- Employer training documentation

Safety Training Seminar Fees:

- \$349 seminar fee (up to 2 students)
- \$75 per additional student
- \$100 for after-hours or weekend sessions
- \$100 travel fee for sessions outside the Portland Metropolitan area
- Permit Recertification: In-person skills review and recertification – \$99 per student

Ask about discounts for large class seminars.

About Forklift Safety Consultants: All Safety Training Seminars are conducted by Clark Patton. For the past 30 years, Clark has provided safety training to thousands of students at hundreds of organizations throughout Oregon and Southwest Washington. Formally trained by Clark Material Handling at their US Headquarters in Kentucky, Clark has more than 40 years of experience in lift truck operation and has worked closely with OSHA personnel throughout his training career.
